

Chemistry 210

Exam 3

Be sure to put your name on each page. This page can be removed from your exam so that you will have a Periodic Table handy throughout the exam, it does not need to be turned in. Show all your work for problems which require any sort of calculation, no credit will be given for answers without work shown. If you have shown a significant amount of work or multiple drawings for a problem, draw a box around what you consider your final answer.

Avogadro's Number = 6.022×10^{23} units/mol

$32.00^\circ\text{F} = 0.000^\circ\text{C} = 273.15\text{K}$

Density of Water = $1.000^{\text{g}}/\text{mL}$

$R = 0.08206 \text{ L}\cdot\text{atm}/\text{mol}\cdot\text{K} = 8.314 \text{ J}/\text{mol}\cdot\text{K}$

$PV = nRT$

$\Delta T_{\text{fp/bp}} = k_{\text{fp/bp}} \cdot m \cdot i$

For water: $k_{\text{fp}} = -1.86^\circ\text{C}/m$
 $k_{\text{bp}} = 0.512^\circ\text{C}/m$

$P_1 = X_1 P_1^\circ$

$\Pi = MRTi$

$C_1 V_1 = C_2 V_2$

Quadratic formula:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Integrated Rate Laws:

0th order $[A]_t = -kt + [A]_o$

1st order $\ln[A]_t = -kt + \ln[A]_o$

2nd order $1/[A]_t = kt + 1/[A]_o$

$k = Ae^{-E_a/RT}$

$$\ln(k) = \left(\frac{-E_a}{R} \right) \left(\frac{1}{T} \right) + \ln(A)$$

$$\ln\left(\frac{k_1}{k_2} \right) = \frac{E_a}{R} \left(\frac{1}{T_2} - \frac{1}{T_1} \right)$$

$$\text{pH} = \text{pK}_a + \log\left(\frac{[\text{conjugate base}]}{[\text{conjugate acid}]} \right)$$

$E_{\text{cell}} = E^\circ_{\text{cell}} - \frac{RT}{nF} \ln Q$

$E^\circ_{\text{cell}} = \frac{RT}{nF} \ln K^\circ$

$K^\circ = e^{(nF/RT) E^\circ_{\text{cell}}}$

$F = 96485 \text{ J}/\text{V}\cdot\text{mol of electrons}$

$\Delta G^\circ = \Delta H^\circ_{\text{system}} - T\Delta S^\circ_{\text{system}}$

$\Delta G^\circ = -nFE^\circ_{\text{cell}} = -RT \ln K^\circ$

$\Delta G = \Delta G^\circ + RT \ln Q$

$F = 96485 \text{ C}/\text{mol electrons}$

$1A = 1C / \text{sec}$

1. Complete each row of the following tables for aqueous solutions at 25°C (4pts per box):

$[\text{H}_3\text{O}^+]$	$[\text{OH}^-]$	pH	pOH	Acidic, Basic or Neutral?
	3.92×10^{-9}			
		8.664		

Conjugate Acid	K_a @ 25°C	Conjugate Base	K_b @ 25°C
HCN			3.0×10^{-5}
	2.9×10^{-7}	HPO_3^{2-}	

2. A labmate has prepared a sulfite/hydrogen sulfite buffer solution at pH=7.13, but does not write much information down in a lab notebook. You know that the concentration of the buffer is 0.63M and $\text{p}K_b=6.80$ for $\text{SO}_3^{2-}(\text{aq})$. Is the concentration of conjugate acid higher in this buffer or is the concentration of conjugate base in this buffer higher? Over what pH range would sulfite/hydrogen sulfite make an effective buffer? Explain your answers. (8pts)
3. What is the expected pH of a 0.449M aqueous solution of potassium nitrite? $\{K_b(\text{NO}_2^-)=2.2 \times 10^{-11}\}$ (10pts)

4. You have prepared a buffer solution by combining 0.492mols of acetic acid ($\text{HC}_2\text{H}_3\text{O}_2$, $K_a = 1.8 \times 10^{-5}$) and 0.385mols of sodium acetate in enough water to make 400.0mL of solution. What is the pH of this buffer solution? (10pts)
5. How much 0.218M $\text{HClO}_4(\text{aq})$ must be added to 25.00mL of 0.153M $\text{KOH}(\text{aq})$ to reach the equivalence point? What is the pH of this solution at the equivalence point? Explain. (10pts)
6. What is the K_b of a weak base if 500.0mL of a solution containing 0.181mol of the base and 0.216mol of its conjugate acid has a pH of 6.772? Over what pH range would this conjugate acid/ conjugate base pair make an effective buffer? (10pts)

11. Sketch the titration curve you would expect for this titration, labeling all equivalence points and sulfurous acid-based species present in each portion of the curve. (10pts)

12. You will have to repeat this titration regularly as part of your job and would like to use a visual indicator in the future. You have the following indicators available: Bromocresol Green (BCG, endpoint range = 3.8-5.4), Brilliant Yellow (BY, endpoint range = 6.6-7.8), Thymol Blue (TB, endpoint range = 8.0-9.6). Which of these visual indicators would be useful in your titration? Explain your choice(s). (8pts)
