---

# What is food made of?

Organic vs. Inorganic

Organic = “from life”, contains C-H bonds

Inorganic = no C-H bonds

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

---

---

---

---

---

---

---

# What is food made of?

Water

Inorganic components

*Salts, minerals*

“Small” Organic Molecules

*Vitamins, metabolites*

Macromolecules

*Lipids, proteins, carbohydrates*

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

## Water

H<sub>2</sub>O!

Very small, simple

Essential to all life on Earth

## *Search for Extraterrestrial Life*

## Most food is mostly water

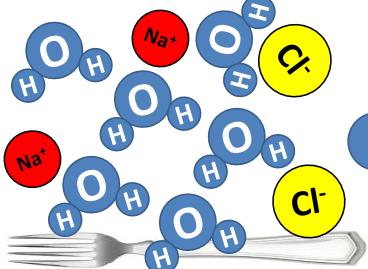

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# Why is water liquid?

Water molecules are bent → polar

Polar molecules stick together

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

## Water Content of Foods

<b>Food</b>	<b>Water Content (%)</b>
<b>Meat</b>	
Pork, raw, composite of lean cuts	53-60
Beef, raw, retail cuts	50-70
Chicken, raw meat without skin	74
Fish, muscle proteins	65-81
<b>Fruits</b>	
Berries, cherries, pears	80-85
Apples, peaches, oranges, grapefruit	85-90
Rhubarb, strawberries, tomatoes	90-95
<b>Vegetables</b>	
Peas (green)	74-80
Beets, broccoli, carrots, potatoes	80-90
Asparagus; beans, cabbage, cauliflower, lettuce	90-95

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# Water in Foods

Water content of some foods	
Food	Water content (%)
Beef	50 to 70
Chicken meat	74
Fish	65 to 81
Pears	80 to 85
Apples, peaches, oranges	85 to 90
Tomatoes, strawberries	90 to 95
Avocado, banana	74 to 80
Carrot, potato	80 to 90
Lettuce, lentils	90 to 95
Honey	20
Jam	28
Flour, rice	12
Milk powder	4

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# Inorganic Components

## “Salts” – charged particles

Sodium chloride →  $\text{Na}^+$  and  $\text{Cl}^-$

## Other trace minerals

Iron, potassium, calcium, magnesium, etc

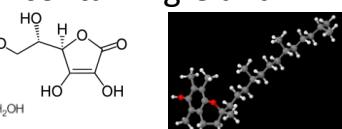

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

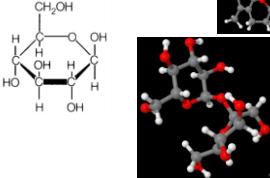

## “Small” Organic Molecules

“Organic” = containing C and H

## Vitamins

## Sugars

## Others

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# BIG Food Molecules

# Lipids

## Proteins

## Carbohydrates

## DNA/RNA

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# Lipids

## Fats

## Long chains of (mostly) C and H

Lipids are non-polar

Don't mix w/water = "hydrophobic"  
"like dissolves like"

Molecule animations: <http://www.biotoptics.co.uk/JmolApplet/jcontentstable.html>  
Fatty acids Jmol:

*Science of Cooking – BCBT100*  
Spring 2014 – Redwin

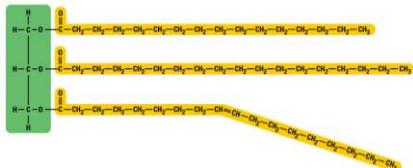

## Fatty Acids/Triglycerides

Vinegar = 2 carbons

Water soluble

**Stearic acid = 18 carbons**

NOT water soluble

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

# Types of Fats

Saturated vs. Unsaturated

Mono- vs Polyunsaturated

"Hydrogenated"

"Omega-3"

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

---

---

---

---

---

---

---

# Macromolecules

Polymers –

poly="many", meros="parts"

Different "parts" result in  
different function/properties

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

---

---

---

---

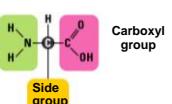

---

---

---

# Amino Acids

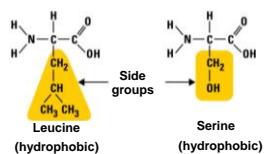

Amino group

Carboxyl group

Amino group

Central Carbon  
Carboxyl group  
Amino group  
Side chain - varies

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

---

---

---

---

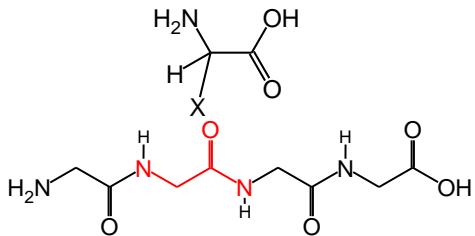

---

---

---

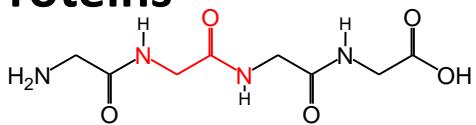

# Proteins

Polymers made of amino acids

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

# Proteins

Shape depends upon properties of side chains interacting with water

Shape = Function

20 “letters”, many “words”

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

## 4 Levels of Protein Structure

Primary – aa order

Secondary – near aa interactions

Tertiary – long range in 1 protein

Quaternary – clusters of proteins

***Denaturing disturbs structure***

Protein structure: [http://en.wikipedia.org/wiki/File:Main\\_protein\\_structure\\_levels\\_en.svg](http://en.wikipedia.org/wiki/File:Main_protein_structure_levels_en.svg)

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

# **Carbohydrates**

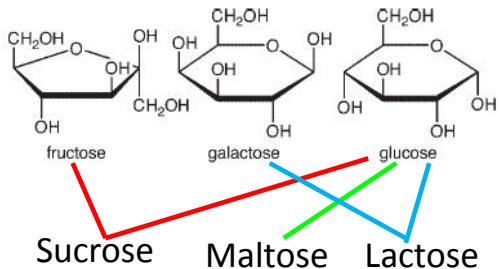

“Carbo” → carbon  
“hydrate” → water, O and H

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

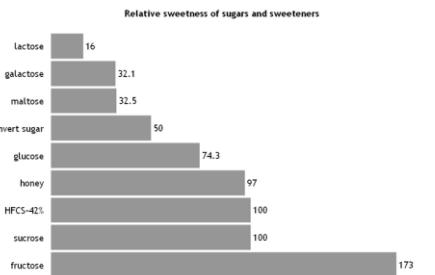

# Common Sugars

Science of Cooking – BCBT100

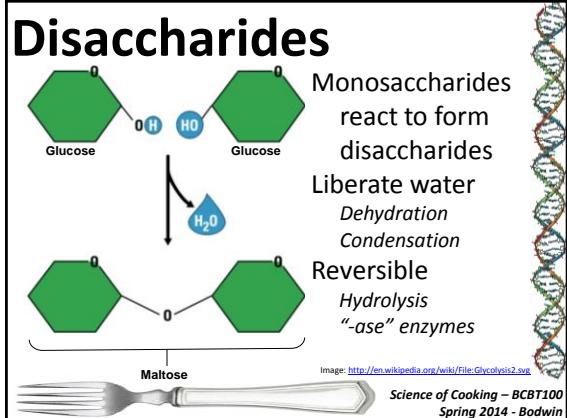

## Common Sugars

*Science of Cooking – BCBT100*  
Spring 2014 – Bedwin

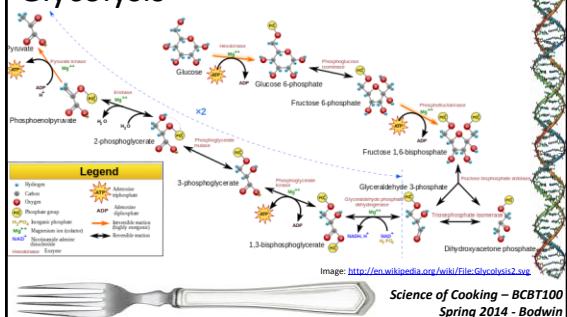

## Disaccharides

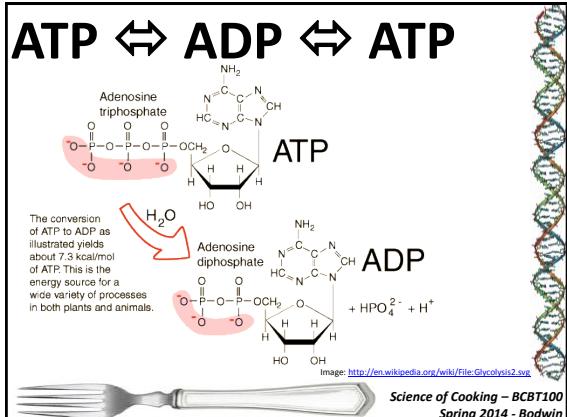

## Sugar Metabolism

### Glycolysis

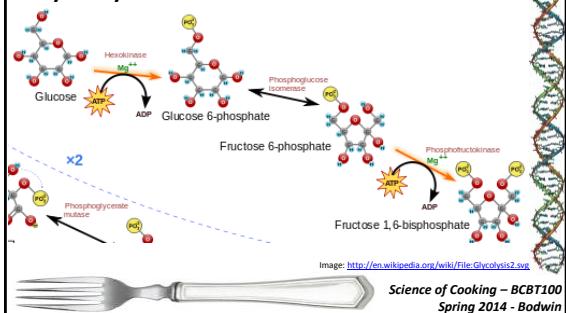

## ATP $\leftrightarrow$ ADP $\leftrightarrow$ ATP

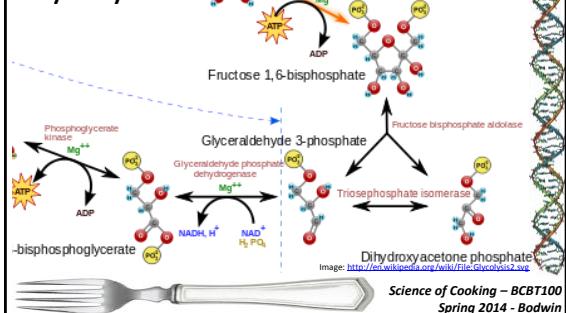

# Sugar Metabolism

## Glycolysis

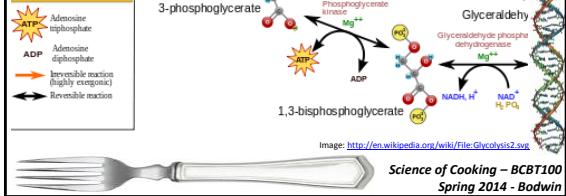

# Sugar Metabolism

## Glycolysis

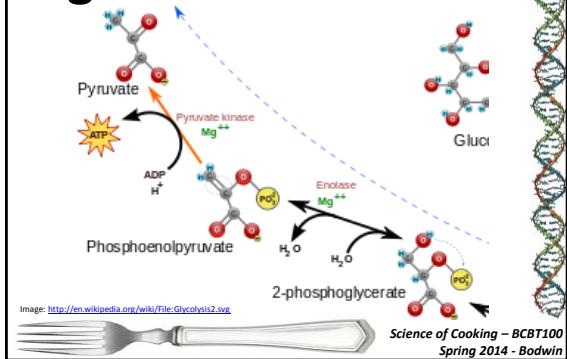

# Sugar Metabolism

## Legend

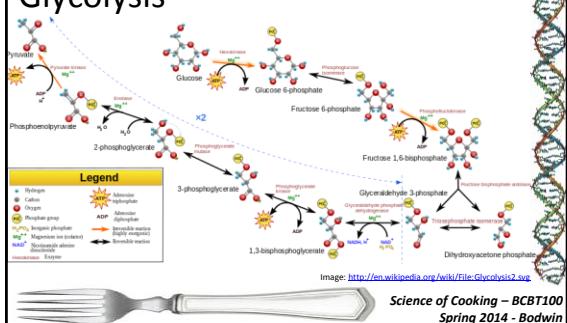

# Sugar Metabolism

# Sugar Metabolism

## Glycolysis

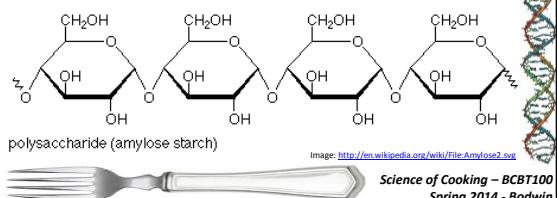

# Polysaccharides

Storage and structure

Starch, Glycogen, Cellulose

*Sugar polymers*

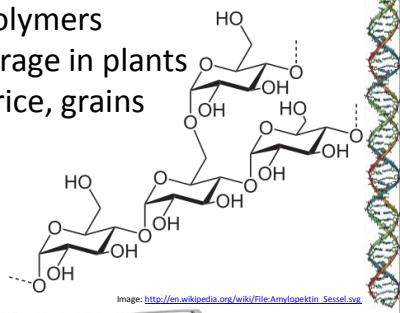

# Starch

Glucose polymers

Energy storage in plants

Potatoes, rice, grains

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

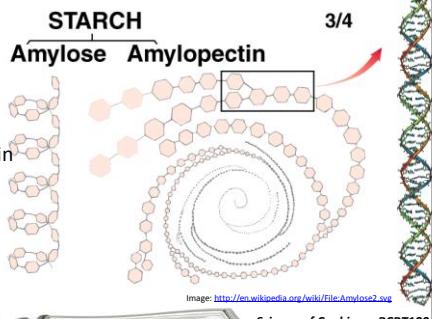

# Starch - Structure

STARCH  
Amylose Amylopectin

Straight chain  
Amylose

Branched chain  
Amylopectin

3/4

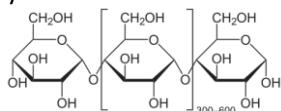

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

# Starch – In foods

Thickener – binds a LOT of water

Provides energy - amylase

Industrially:

Dextrose = glucose derived from  
hydrolyzed starch

HFCS – dextrose treated with glucose  
isomerase

Image: <http://en.wikipedia.org/wiki/File:Amylose2.svg>

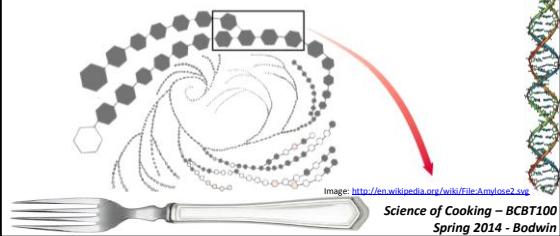

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

## Glycogen – “animal starch”

## Highly branched glucose polymer

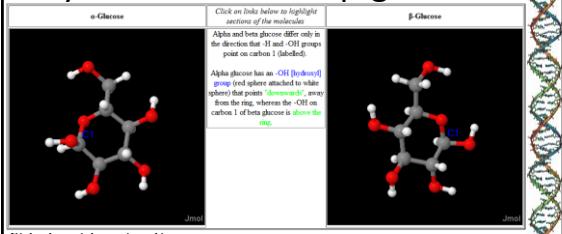

## Energy storage

## **GLYCOGEN**

## Cellulose

## Polymer made from $\beta$ -glucose

### Side-by-side animations:

<http://www.biographics.co.uk/JmolApplet/alphaBetaGlucose2.html>

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

## Cellulose

Enzymes that break amylose  
can't break cellulose

Rigid, tough *fibers* that make plant cell walls and stalks

## Cross-linking

*Science of Cooking – BCBT100*  
*Spring 2014 - Badwin*

# **Cellulose - Dietary**

## Insoluble Fiber

Highly modified cellulose, up to ~1/2 the mass of a plant

Binds water, “feel full”

Draws water into gut

### Fruits, vegetables, whole grains

*Science of Cooking – BCBT100  
Spring 2014 - Bodwin*

# **Cellulose - Dietary**

## Soluble Fiber

## Highly modified cellulose

Forms gel with high water content

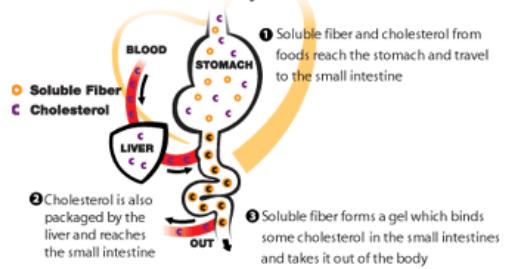

Water-soluble substances absorbed by gel – “intestine sweeper”

*Science of Cooking – BCBT100*  
*Spring 2014 - Bodwin*

# **Cellulose - Dietary**

### **How Soluble Fiber May Lower Cholesterol**

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

# Cellulose – Food source?

Cellulosic fiber is indigestible

Most animals lack enzymes to break down cellulose

Ruminants have bacteria in the gut that {partially} digest cellulose to glucose

Image: [http://www.publicdomainpictures.net/view-image.php?image\\_id=627&picture=black-cow](http://www.publicdomainpictures.net/view-image.php?image_id=627&picture=black-cow), <http://www.cvm.ncsu.edu/vbz/cfac/thm/>

Science of Cooking – BCBT100  
Spring 2014 - Bodwin

---

---

---

---

---

---

---

# Interactions

Fats and water

Amphiphiles

Micelles

Emulsifiers

Science of Cooking – BCBT100  
Spring 2014 - Bodwin
